

MASTER OF ARTS IN THE FIELD OF ART THERAPY

George Washington University's master of arts in art therapy program prepares students for careers in schools, healthcare institutions, research centers, and more. Under the mentorship of faculty members who are credentialed art therapists, students explore their artistic identity, as well as the varying aspects of art therapy, trauma training, diagnosis, and assessment. The curriculum also builds a theoretical foundation in individual, family, and group counseling, psychopathology, and human development.

Students have the option to deepen their focus in a specific area by writing a thesis. By the end of the program, all students complete nearly 1,000 required hours of internship. Graduates leave prepared to earn professional licensure in art therapy and counseling.
